Summary

I'm a Senior Data Engineer passionate about technology and innovation. I've had the opportunity to work in amazing companies such as Farfetch, Santander, PagSeguro, Magazine Luiza, Samsung, and Volkswagen group. Throughout my career, I aimed to learn from everyone around me and share my knowledge as well.

I'm driven by knowledge and still looking forward to improving my skills even more in the data field, facing new challenges, and learning new concepts regarding Web development, AI, ML, Cloud, Data engineering, CI/CD, and DevOps.

Experience

Senior Data Engineer

Otrium

Oct 2022 - Present (2 months +)

Part of the data engineering team which is responsible for the data platform at Otrium. The main responsibilities of this team consist to attend business requirements such as:

• Data Wrangling: Measure the completeness, accuracy, and other data quality KPIs.
• Infrastructure Enablement for data pipelines
• Security and privacy management (Data and Infrastructure)
• Provide a centralized repository of data to use cases, data-driven projects, and ML.
• Pipelines: Developing, managing, and troubleshooting.

Main development: Python.
Tools / Software: AWS (Lambda, S3, EMR, Redshift), Codefresh (DevOps), Terraform, Databricks, DBT, Fivetran, and BitBucket.

Senior Data Engineer

Philip Morris International

Jun 2022 - Sep 2022 (4 months)

Part of the data engineering team which is responsible for the data platform at PMI. The main responsibilities of this team consist to attend business requirements such as:

• Infrastructure Enablement
• Security and privacy management (Data and Infrastructure)
• Conceptualization of new tech solutions

Description: Using DevOps culture day-by-day and Scrum agile methodology to support the data lifecycle management, troubleshooting (infrastructure and data incidents), security and privacy management(GDPR), and development of new features or infrastructure enablement within the AWS environment.
Main development: Python.

Tools / Software: Terraform, BitBucket, Jfrog, Hashicorp Vault, AWS (SDK, Lambda, S3, KMS, ELB, IAM, Route53, CloudWatch, Serverless, API Gateway), CI/CD using CloudBees Jenkins, and Docker.

Data Engineer

OLX Group

Feb 2022 - Jun 2022 (5 months)

Part of the data engineering team that is responsible for the integration between product and CRM platform. The main responsibilities of this team consist to attend business requirements such as:

• Modeling: Conceptualize and structure product data models, ensuring high standard quality according to business needs.
• Privacy management (GDPR)
• Data Wrangling: Measure the completeness, accuracy, and other data quality KPIs.
• Pipelines: Developing, management, and troubleshooting.
• Knowledge base: Responsible for creating and maintaining up-to-date documentation holding business logic referring to each KPI present in our data model.

Description: Using software engineering best practices and Scrum agile methodology to support the data lifecycle management (real-time and batch), incidents (data inaccuracy, schema evolution, and pipeline issues), privacy management(GDPR), and data enablement within the AWS environment.
Main development: Python and SQL.
Tools / Software: AWS (Lambda, S3, Redshift, Secrets Manager, IAM, EKS), CI/CD using GitLab, Docker, and Terraform.

Senior Data Engineer

FARFETCH

Aug 2021 - Dec 2021 (5 months)

Part of the data engineering team that is responsible for the product data domain. The main responsibilities of this team consist to attend business requirements such as:

• Modeling: Conceptualize and structure product data models, ensuring high standard quality according to business needs.
• Data Wrangling: Measure the completeness, accuracy, and other data quality KPIs.
• Pipelines: Developing, management, and troubleshooting.
• Knowledge base: Responsible for creating and maintaining up-to-date documentation holding business logic referring to each KPI present in our data model.

Description: Using Scrum agile methodology to support the data lifecycle management, incidents (data inaccuracy, schema evolution, and pipeline issues), security and privacy management(GDPR), and data enablement using the tools within the cloud providers GCP and Azure.
Main development: Python and SQL.
Tools / Software: GCP (BigQuery), Azure (Azure Data Lake Storage), Apache Airflow, and CI/CD (Jenkins, Octopus, and GitLab).

Senior Data Engineer (DevOps)

Volkswagen Digital Solutions

Oct 2020 - Jul 2021 (10 months)

Part of the data engineering team which is responsible for the data platform on MAN Truck and Bus. The main responsibilities of this team consist to attend business requirements such as:

• Infrastructure Enablement
• Security and privacy management (Data and Infrastructure)
• Conceptualization of new tech solutions
• Provide a centralized repository of data to use cases, data-driven projects, and after-sales.

Description: Using DevOps culture day-by-day and Scrum agile methodology to support the data lifecycle management (real-time and batch), troubleshooting (infrastructure and data incidents), security and privacy management(GDPR), and development of new features or infrastructure enablement within the AWS environment.
Main development: Java, Scala, and Python.
Tools / Software: AWS (SDK, ECS, ECR, Glue, Lambda, S3, Fargate, Systems Manager, Cloudformation, ELB, IAM, Route53, CloudWatch, Serverless, ES - Elastic Search, Kibana, API Gateway), NIFI, CI/CD using GitLab, Kafka (Consumers, producers, and connectors), Sceptre, Troposphere, and Docker.

Senior Data Engineer
Samsung SDS Latin America
Apr 2018 - Sep 2020 (2 years 6 months)
Description: My main responsibilities were focused on data lifecycle management, DevOps, security and privacy management (GDPR), and the development of new features or infrastructure enablement according to the customer's business requirements.
Main development: Java, Scala, and Python.
Tools / Software: Hadoop, Spark, Docker, Hive, Sqoop, Kylo Teradata, Talend, Apache Nifi, MySQL, MSSQL, PostgreSQL, and Oracle 11g.

Data Engineer
MJV Technology & Innovation
Jan 2018 - Apr 2018 (4 months)
Part of the data engineering team that was responsible for the data platform on mobile operator Claro S/A.

Description:: Worked on two projects with high complexity related to Claro's OLTP systems, technical leader on initial requirements gathering, modeling, development, and post-production.
Main development: T-SQL and PL-SQL.
Tools / Software: Power Center, Oracle 11g.

Data Engineer
Marketdata
Jan 2017 - Dec 2017 (1 year)

Senior Business Intelligence Analyst
Marketdata
Jun 2012 - Jan 2017 (4 years 8 months)
Description: Worked as technical leader on initial requirements gathering, data modeling, development, and post-production. Experience working as a consultant in companies with huge complexity such as Claro, NET, Santander, and PagSeguro (UOL).

Main development: T-SQL, PL-SQL, and Java.
Tools / Software: SSIS, MSSQL, SAS, SAS CI, MySQL, and Oracle 11g.

Information Technology Coordinator
Burson-Marsteller
Aug 2010 - Apr 2012 (1 year 9 months)
Description: Worked as IT technical leader responsible for Server management, remote and local support.
Tools / Software: AD, DHCP, DNS, Webservers (IIS), MSSQL, Oracle, Veritas NetBackup and ArcServer.

Education

Harvard University
CS50 - Computer Science for Web Programming, Web Development
Sep 2022 - May 2023

Universidade de São Paulo
Postgraduate in Big Data - Intelligence in Data Management
Jan 2018 - Jan 2019

Universidade Estadual de Campinas
Postgraduate in Database Systems Engineering , Database Systems
2014 - 2015

Impacta Tecnologia
Postgraduate in Information Security Management
2008 - 2010

Estácio
Information technology
2005 - 2007

Licenses & Certifications

MCITP Server Administrator - Microsoft

1Z0-051 — Oracle Database 11g: SQL Fundamentals - Oracle

Astronomer Certification for Apache Airflow Fundamentals - Astronomer

Astronomer Certification DAG Authoring for Apache Airflow - Astronomer

Hands On Essentials - Data Warehouse - Snowflake

Academy Accreditation - Databricks Lakehouse Fundamentals - Databricks
Issued Jun 2022 - Expires Jun 2023
53828997

Matillion Academy | Building a Data Warehouse using Matillion - Matillion
S6nFedzK4Q

dbt Fundamentals - dbt Labs
Issued Aug 2022 - Expires Aug 2024

Spark - IBM

Docker Essentials - IBM

Scala Programming for Data Science - IBM

Simplifying Data Pipelines with Apache Kafka - IBM

AWS Cloud Quest: Cloud Practitioner - Amazon Web Services (AWS)

Skills

dbt • Databricks • Terraform • Bitbucket • Jenkins • Continuous Integration and Continuous Delivery (CI/CD) • Agile Methodologies • Snowflake • Amazon Web Services (AWS) • SOQL
